

Mini-course: Design your own bioimpedance meter

Dr. Pedro Bertemes Filho

pedro.bertemes@udesc.br

Santa Catarina State University, Brazil

The mini-course will be on bioinstrumentation, but especially focused to the bioimpedance field. It is open to all students (domestic and foreign) that are interested in biomedical instrumentation. An intermediate knowledge on electronics is recommended and pre-registration is needed. There will be no exam at the end of the course, which will be divided in 3 section:

PART 1 - Bioimpedance meters: hardware and concepts;

PART 2 - Developing a basic bioimpedance meter;

DAY 3 - Bioimpedance meter: practical works.
